How the Marketing Analyzer Accelerates Connector Performance

The Marketing Analyzer currently lives only inside the Mailchimp app. Connector users with access to it dramatically outperform those without.

1. Closes the Gap on Email Sends & Segment Creation

Metric	Connector + Marketing Analyzer (3,166 users)	Connector Alone (3,680 users)	Lift
Segment creation rate	**68.8%**	27.3%	**2.5x**
Email send rate	**88.5%**	46.0%	**1.9x**
Avg segment actions/user	**78**	22	**3.5x**
Avg emails delivered/user	**328,194**	90,915	**3.6x**

Connector users with the Marketing Analyzer create segments at **2.5x the rate**, send emails at **1.9x the rate**, and deliver **3.6x more emails per user**.

2. Drives Plan Upgrades & Free-to-Paid Conversion

Standard to Premium (Jan–Apr 2026)	Upgrade Rate	Multiplier
Active segmenters	**0.223%**	**3.7x**
Non-segmenters	0.061%	

Free-to-Paid Conversion	Free Users	Converted	Rate
Free users with Marketing Analyzer	25,159	**25,001**	**99.4%**
Free connector users (no analyzer)	2,327	278	12.0%
Platform (no connector, no analyzer)	46.7M	101,218	0.2%

Active segmenters upgrade Standard to Premium at **3.7x the rate**. Free users with analyzer access convert to paid at **99.4%** vs 12% for free connector users without it.

Multi-Product Stacking Effect

Products Used	Users	WAU %	Incremental vs 0
0 products	1,917	13.2%	—
1 product	1,170	32.5%	**+19.3 pts**
2 products	1,717	52.6%	**+39.4 pts**
3 products	1,759	71.2%	**+58.0 pts**
4 products	283	**76.0%**	**+62.8 pts**

Each additional product compounds WAU: **13% → 33% → 53% → 71% → 76%**. Users with 3+ products are **5.4x more likely** to be weekly active than those with none. The Marketing Analyzer is the fastest path to adding segmentation as the next product for the 1,917 users currently at zero.

Strategic Implication

> Claude has overtaken ChatGPT and is now Mailchimp's fastest-growing connector channel. The combined base of 6,957 users is highly engaged, with strong automation and SMS adoption. The Marketing Analyzer is the accelerant that closes the remaining email/segment gap and fixes the critical paid-conversion problem.

Embedding the Marketing Analyzer in the connector experience would: (1) **close the email and segment gap** with a demonstrated 2.5-3.6x lift across 3,680 users who currently lack it, (2) **accelerate upgrades** — segmenters upgrade Standard to Premium at 3.7x, and free users with analyzer access convert at 99% vs 12% without, and (3) **compound the multi-product stacking effect** — each product adds ~20 pts of WAU, and the analyzer is the fastest way to get 1,917 zero-product users to their first product.

Prioritize embedding the Marketing Analyzer in Claude first — it has the larger user base (4,013), higher paid mix (51%), and stronger engagement at every tier.
